EDUCATION

University at Albany, SUNY – M.S. Data Science – Albany, New York 2024 – 2026
Vishwakarma Institute of Information Technology – B.Tech AI & Data Science – Pune, India 2020 – 2024

EXPERIENCE

Prabha Industries Jan 2024 – Jul 2024

AI/ML Intern – Manufacturing Analytics

- Analyzed manufacturing data across multiple production lines to identify recurring operational and quality patterns, then developed a machine learning model for earlier defect detection compared with manual inspection.
- Created interactive production KPI dashboards, replacing manual status checks with a consolidated operational view for manufacturing stakeholders.

Accutech Engineers Pvt. Ltd.

Aug 2023 – Dec 2023

Data Engineering Intern

- Engineered Python and SQL preprocessing and transformation workflows to clean, validate, and analyze structured manufacturing and operational datasets.
- Prepared raw operational data as analysis-ready datasets, reducing manual preparation for downstream reporting and analytics workflows.

OMESA Engineers & Exports Pvt. Ltd.

Jun 2022 – Jun 2023

Operations Data Analyst – Full-Time

- Analyzed production, inventory, and order data using SQL and Excel across multiple years of operational history, identifying recurring production and fulfillment bottlenecks.
- Built 6 Tableau and Power BI dashboards integrating 4 data sources to track production, inventory, downtime, and order performance for approximately 20 manufacturing and operations stakeholders.
- Automated weekly reporting with Python and Pandas and performed trend and variance analysis to surface production delays and inventory discrepancies for weekly operational reviews.

TECHNICAL SKILLS

Languages & Databases: Python, SQL, MySQL, PostgreSQL

Analytics & Visualization: Pandas, NumPy, EDA, Tableau, Power BI, Plotly, Matplotlib, Seaborn, Microsoft Excel

AI/ML & Data Science: Machine Learning, NLP, Time Series Forecasting, Feature Engineering, Model Evaluation, Statistical Analysis

Generative & Agentic AI: RAG, LangChain, LangGraph, FAISS, MCP, Prompt Engineering, OpenAI API, LLM Evaluation

Data Engineering & Cloud: dbt, AWS (S3, EC2, Bedrock), Microsoft Azure, Docker, REST APIs

Developer Tools: Git, GitHub, Linux, Streamlit

PROJECTS

PipelineGuard | *Python, PostgreSQL, dbt, Streamlit*   2026

- Developed an end-to-end data pipeline supporting CSV ingestion, validation, PostgreSQL storage, dbt transformations, and analytics.
- Designed staging and analytical models and surfaced revenue, order, and operational KPIs through an interactive Streamlit dashboard.

ProofRAG – Agentic Research Answer Auditor | *Python, RAG, FAISS, Streamlit*   2026

- Engineered an agentic RAG system that retrieves evidence from uploaded documents, generates grounded responses, and audits answers for source support.
- Implemented document chunking, vector embeddings, semantic search, citation generation, and evidence-based evaluation, validating outputs against test queries by tracing citations back to source content.

FIFA 2026 Player Performance Analytics | *Tableau*  2026

- Published an interactive Tableau dashboard analyzing player and team performance using KPIs, filters, and drill-down visualizations.

SentinelML – Real-Time Equipment Failure Prediction & ML Monitoring | *XGBoost, SHAP, MLflow, FastAPI* 2026

- Engineered an ML pipeline using XGBoost and LightGBM to predict equipment failures from real-time sensor data, with SHAP explainability and MLflow experiment tracking.
- Validated predictions against historical failure logs to verify elevated-risk detection ahead of known failures, then deployed real-time risk scoring using FastAPI and Docker.
