EDUCATION

University at Albany, SUNY – M.S. Data Science – Albany, New York	2024 – 2026
Vishwakarma Institute of Information Technology – B.Tech AI & Data Science – Pune, India	2020 – 2024

EXPERIENCE

Prabha Industries – AI/ML Intern: Manufacturing Analytics	Jan 2024 – Jul 2024
- Analyzed 25K+ manufacturing records across 4 production lines using Python, SQL, and Pandas to identify defect and quality patterns. - Built a machine learning defect-detection model using 15+ production features, achieving 87% classification accuracy. - Developed 3 KPI dashboards tracking 10+ metrics including defect rate, throughput, downtime, and production variance.	
Accutech Engineers Pvt. Ltd. – Data Engineering Intern	Aug 2023 – Dec 2023
- Processed 40K+ operational records from 5 datasets using Python, SQL, and Pandas for downstream analytics and reporting. - Built reusable SQL transformations across 8+ tables using joins, aggregations, filtering, and data validation. - Implemented 15+ data-quality checks and automated preprocessing workflows, reducing manual preparation by 30%.	
OMESA Engineers & Exports Pvt. Ltd. – Operations Data Analyst - Full-Time	Jun 2022 – Jun 2023
- Analyzed 100K+ production, inventory, and order records using SQL, Excel, and Python to identify operational bottlenecks and trends. - Built 6 Tableau and Power BI dashboards integrating 4 data sources and tracking 15+ KPIs for approximately 20 stakeholders. - Automated weekly reporting using Python and Pandas, reducing manual data preparation by 35%.	

TECHNICAL SKILLS

Languages & Databases: Python, SQL, PostgreSQL, MySQL, Snowflake
Analytics & BI: Pandas, NumPy, Excel, Power BI, Tableau, Power Query, DAX, Statistical Analysis
Machine Learning: Scikit-learn, XGBoost, LightGBM, Feature Engineering, Time Series Forecasting, SHAP, MLflow
Data Engineering & Cloud: ETL/ELT, dbt, Airflow, Spark/PySpark, Data Modeling, Data Quality, AWS, Azure
AI & Development: RAG, LangChain, LangGraph, FAISS, MCP, FastAPI, REST APIs, Docker, CI/CD, Git, GitHub

PROJECTS

PipelineGuard <i>Python, PostgreSQL, dbt, Streamlit, CI/CD</i>	2026
- Built an end-to-end ETL pipeline processing 100K+ records through ingestion, validation, PostgreSQL storage, and dbt transformations. - Created 8+ analytical models and 20+ data-quality tests to surface revenue, order, and operational KPIs.	
SentinelML – Equipment Failure Prediction <i>XGBoost, SHAP, MLflow, FastAPI</i>	2026
- Trained XGBoost and LightGBM models on 50K+ sensor records for failure prediction with SHAP explainability and MLflow tracking. - Deployed real-time risk scoring using FastAPI and Docker, validating predictions against historical failure events.	
Customer360 – Revenue & Retention Analytics <i>SQL, Python, dbt, Power BI</i>	2026
- Analyzed 100K+ customer transactions using SQL and Python to measure revenue, retention, churn, cohorts, and purchasing behavior. - Built 8+ dbt models and 12+ KPIs with a Power BI dashboard for segmentation, funnel, and revenue analysis.	
ProofRAG – Agentic Research Answer Auditor <i>Python, RAG, FAISS, LangGraph</i>	2026
- Built an agentic RAG system indexing 1K+ document chunks for semantic retrieval, grounded responses, and citation verification. - Implemented embeddings, vector search, source tracing, and LLM evaluation to detect unsupported responses.
